Important Notes

- **Ninova:** You need to follow the course announcements, check your exam results, and attendance status on the Ninova system (<http://ninova.itu.edu.tr/>). Check the Ninova site regularly for updates.
- **ITU Email Accounts:** Course related e-mail notifications will be sent to your ITU account; check it regularly.
- **Email Etiquette:** When sending e-mail to the instructors or assistants, use your ITU account and always include your full name at the end of the message.
- **Classroom Announcements:** You are expected to know everything that was announced in the classroom. There does not necessarily have to be an announcement on Ninova. If you have missed a class, ask your classmates if there were any announcements that you need to know.
- **Attendance Checks:** On the classroom plan, write your student ID and full name into the box where you sit, and sign underneath your name. On Ninova, you will see the number of hours you were present that week. Report any errors regarding your attendance to the instructors as soon as possible. You are responsible for keeping track of your attendance record.
- **Notes:** Although resources are provided, you are expected to take notes during the lectures. This is important for your learning both of the topic and of how to acquire and organise information.
- **Provided Software:** Assignments require use of certain software packages. It is your job to acquire this software to use on your personal computer. However, a software “image” containing an operating system with this software installed, that can be loaded onto a bootable memory stick, will be provided to ease this task.
- **Exercise Sessions:** Laboratory space with power supply and wireless internet access will be provided for exercise sessions. However, you will be responsible for organizing yourselves into groups appropriate for the space provided, and for ensuring that there is one mobile computer (laptops) with the necessary software loaded available for the group.
- **Collaboration:** Some homework in this course consists of individual assignments. In other words, collaboration on these assignments is not allowed. You are encouraged to help your classmates understand the material, but you should refrain from discussing any issues specific to the assignment. You should definitely not share any homework documents for any reason with anybody.
- **Plagiarism:** Any form of cheating or plagiarism will not be tolerated. This includes actions such as, but not limited to, submitting the work of others as one's own (even if in part and even with modifications), and providing work for others to submit. Serious offences will be reported to the faculty administration for disciplinary measures. Please carefully read the following document prepared by the Student Affairs Office: <http://www.odek.itu.edu.tr/?Sayfald=13>
